Skills

React.js, Redux, JavaScript, Java, HTML5, CSS3, Python, Flask, SQL, postgresSQL, Sequelize, SQLAlchemy, Heroku, Render, Adobe Premiere Pro, Adobe After Effects, Adobe Photoshop, Autodesk Maya, ZBrush, Websockets, socket.io

Projects

Banana

[live site](#) | [github](#)

HTML5 , Python, JavaScript , CSS3 , Adobe Photoshop, Heroku

A banana-themed parody of apple.com

- Implemented a dynamic shopping cart which updates information based on signed-in user
- Created CSS so accurate to original site that clone is flagged as deceptive site
- Added witty copy and images to keep app feeling fun

Disco-ord

[live site](#) | [github](#)

JavaScript , React / Redux , Python , postgresSQL , CSS3, Render , Websockets, socket.io

A groovy disco take on Discord

- Refactored frontend in minimal time to use React routes, keeping information persistent on refresh
- Implemented web socket support into app allowing users to chat with one another in real time
- Organized project documentation and communicated tasks to fellow team members

Pirate Radio

[live site](#) | [github](#)

JavaScript , React / Redux , postgresSQL , CSS3 , Express, Heroku

Soundcloud clone with a Pirate twist

- Created a case-insensitive search field which queries across song titles and users
- Implemented continous audio player
- Fleshed out 2 full CRUD features ofr Songs and Comments and 2 partial CRUD features for Users and Likes

Experience

Salesman | January 2022 - Jun 2022

Divergent Solar

- Sold 12 kw system after less than a week at company
- Kept consistent self managed schedule for knocking doors and following up with potential customers
- Trained new hires on pitch basics and door etiquette

Education

App Academy | Jun 2022 - Dec 2022 | Remote

Immersive software development course with focus on full stack web development

University of New Mexico | August 2018 - May 2021 | Albuquerque, NM

Bachelor of arts in Video Game Design, Cum Laude

University of British Columbia | August 2016 - May 2018 | Vancouver, BC
